

Industry Champions – Inspiring the Future Workforce

Coast to Capital Local Enterprise Partnership are looking for dynamic and enthusiastic 'Industry Champions' to work with young people in our local secondary schools and colleges on a range of activities.

We are building a network of Industry Champions that can represent an array of job roles and career paths across all industry sectors, and in particular the priority sectors for this region. Industry Champions will be individuals working at any level within an organisation, be it as CEO, sole trader, freelancer, or an apprentice, who has an interest in sharing their experience of work and promoting their industry.

An Industry Champion will:

- Be directly involved with delivering activities for young people in schools
- Have an ability to present their role, experience and knowledge with a positive energy and strong understanding of their industry
- Commit some time to careers and enterprise activities in schools such as giving short talks / presentations at school/college events, mentoring young people, attending careers fairs, giving on-site tours of their business; offering work experience opportunities
- Have the opportunity to work locally or with different schools across the region

The Industry Champion role is a rewarding experience for staff at any level and offers an opportunity for staff to develop their skills.

Coast to Capital Local Enterprise Partnership will support the Industry Champions Network through training, support and sharing best practice.

If you are interested in being involved as an Industry Champion, please contact the team at: ean@coast2capital.org.uk
